Cardassian Repair Facility
Heavy Spacedock; Commissioned: 2355

Hull Data
Structure: 65 [191 space][0 space remains]
Size/Decks: 11/135
Height/Diameter: 407/1,400 m
Complement: 6,750

Tactical Data
Spiral Wave Disruptors: C-GDM-5 (x3/C) [-18]
Penetration: 5/5/4/0/0
Deflector Shield: FSQ (D) [-12]
Protection/Threshold: 17/2

Docking Data
Docking Bays: 5 [-10]
Shuttlecraft: 55 size worth (Size 3 max.)
Docking Ports: 10 [-20]
Docked Starships: 30 size worth (Size 5 max.) [-25]
Docking Pylons/Berths: 5
Docked Starships: 25 size worth (Size 11 max.)

Operational Data
Cargo Units: 165 [-11]
Life Support: Class 3 (D) [-8]
Operations System: Class 3 (D) [-8]
Sensor System: Class S3a (0/0/+1/+2/+3/CC) [-8]
Power System: Class 4 (E) [-14]
Sublight Drive: No [0]
Orbital Correctors: ST-A (0) [-12]
Engineering Facilities: Class 5 (+6) [-10]
Separation System: No [0]
Tractor Beams: 2 u, 1 m, 2 d [-4]
Transporters: 7 standard, 7 emergency, 7 cargo [-6]

Miscellaneous Data
Maneuver Modifiers: 0C, -8H, 0T
Traits: Enhanced System (Engineering) [-5]
Hangarbay
Hardened System (Operations) [-5]
Mission

The Cardassian Repair Facility is used to create and repair new starships.

Features

The Repair Facility is lightly armed and protected for a station of its size, roughly comparable to a Galor-class starship.

The true strength of the Repair Facility is its extensive docking, accommodating multiple Hideki-class starships (and later Jem'Hadar Attack Ships), as well as construction and repair facilities for several Galor or Keldon-class ships.

Background

The Cardassian Union, throughout the 24th century, lacked the technological sophistication of the Federation and Romulans. To compensate for this lack, the Cardassians produced a large number of less-sophisticated, but easier to maintain and build starships. The numerous repair facilities scattered throughout Cardassian space were critical to this endeavor.
