Mission

The Neptune-class is an intra-system defense vessel. Although the Neptune is warp-capable, that warp drive is only rarely used, and even then to transfer Neptunes to a system for permanent defense.

Features

The Neptune-class is armed with low-yield phase cannons and spatial torpedoes, standard armament for early 22nd century Earth starships. Its hull polarization grid allows the ship significantly better protection than the hull armor of prior eras, though it is nothing compared to a true shield grid.

Background

United Earth, once it began exploring beyond the confines of the Sol system, began encountering belligerent if not outright hostile alien species. The United Earth Starfleet responded by fielding one of its first true starship designs, the Neptune. Though lacking the firepower of many alien starship designs, it made up for this through sheer numbers.
