**ALAMO-class Defense Outpost**

**Production Data**
Origin: United Federation of Planets  
Class and Type: Alamo-class defense outpost  
Year Launched: Originally in 2265; major refit in [2292]

**Hull Data**
Structure: 60 [50]  
Size/Decks: 10/102 decks  
Length/Height/Beam: 560/510/195 meters  
Complement: 460

**Operational Data**
Transporters: 10 standard, 10 emergency, 10 cargo  
Cargo Units: 100  
Shuttlebay: Yes (2 upper dome F/A, 2 central platforms F/A, 2 lower dome F/A)  
[2 upper dome F/A, 2 central platforms F/A]  
Shuttlecraft: 60 size worth [40 size worth]  
Tractor Beams: 3, upper dome ventral  
Sensor System: Class 2 (+2/C)  
Operations System: Class 3 (D)  
Life Support: Class 3 (D)

**Propulsion Data**
Impulse System: Type V (equivalent fusion generator) (D)  
Warp System: Type VI (equivalent antimatter generator) (D)

**Tactical Data**
Phaser Banks: Type VII (x9/E)  
Penetration: 7/7/6/0/0  
Photon Torpedoes: Type I (x6/E) [Type III (x6/E)]  
Penetration: 5/5/5/5/5 [7/7/7/7/7]  
Deflector Shield: Class 2a (B) [Class 4 (C)]  
Protection/Threshold: 13/3 [14/3]

**Miscellaneous Data**
Maneuver Modifiers: +6 C, -10 H, +5 T
“Always remember why we’re here, ladies and gentlemen. We are the first line of defense for the Federation. Billions depend upon us for their very survival, and they don’t know it...nor should they. We are their sword and their shield, standing watch so that they can sleep peacefully at night. We are Horatio against the Etruscans: We stand on the bridge, and none shall pass.”

Commodore Jeremy Wilford, closing his first staff meeting aboard the first Alamo-class outpost station, 21 February 2265

**Description & History**

The Alamo-class defense outpost was one of the most massive structures built by the Federation, especially at the time of its initial construction. Conceived primarily in response to growing Klingon aggression shortly before the famous five-year mission of the *U.S.S. Enterprise*, the first of these stations went online in 2265. Dozens of these stations were deployed along the border, in orbit around strategically important planets.

The Alamo-class stations would not see a major refit for over 25 years. In 2292, during the height of the “cold war” with the Klingons after the Genesis incident, the stations received upgrades to both their torpedo launchers and their shield generators. With most of their systems at state-of-the-art levels now, and with their high-durability spaceframes, Alamo-class stations are expected to be the line in the sand for the Federation well into the 24th century.
