Doomsday Machine

Battleship; Commissioned ~30,000 B.C.E.

HULL DATA

Structure: 65 [249 space] [4 space remaining]

Size/Decks: 13/None

Length/Beam/Height: 2,772/607/607 meters

Complement: None

TACTICAL DATA

Beam Weapon: Pure Antiproton Beam (x1/F) [-60 space]

Penetration: 9/9/8/0/0

Defensive System: Neutronium Hull (FF) [-27 space]

Protection/Threshold: 25/9

PROPULSION DATA

Impulse System: RSM (.75c) (D) [-24 space]

Warp System: PB-1 (1/2/4) (A) [-72 space]

OPERATIONAL DATA

Atmosphere Capable: No [0 space]

Cargo Units: 130

Life Support: Class 5 (F) [-11 space]

Operations System: Class 5 (F) [-11 space]

Sensor System: Class 5 (+5/+4/+3/+2/+1/F) [-5 space]

Separation System: No

Shuttlebay: None [0 space]

Shuttlecraft: None

Tractor Beams: 1 f [0 space]

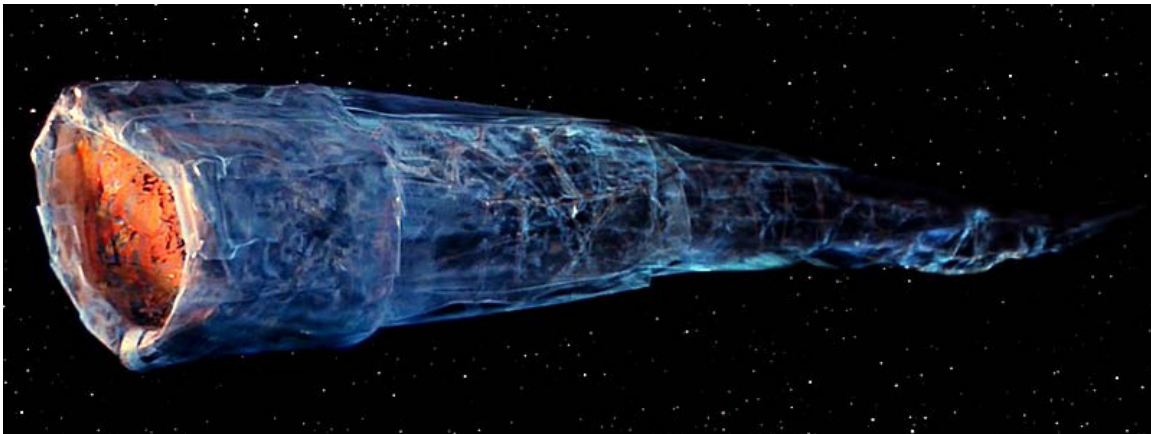

Transporters: None [0 space]

MISCELLANEOUS DATA

Maneuver Modifiers: +4C, +1H, +4T

Traits: Hardened System (All systems) [-35 space]

Unique System (Dampening Field; +5 TN to all subspace communications when within Medium range or closer. Propulsion systems suffer 1 damage per round of combat within Point Blank range.)
